## Getting There

The Asulkan Cabin is located high up in the Asulkan Valley in the Rogers Pass area of Glacier National Park in British-Columbia, about halfway between Revelstoke and Golden.

The following information should be used in conjunction with the correct topographic map (maps are listed below).

### Summer

<b>Trailhead location:</b>	3.5 km west of Rogers Pass Information Center
<b>Hiking distance:</b>	Approximately 6.5 km one way
<b>Elevation gain:</b>	2600 feet (729 meters) from the parking lot
<b>Approximate time:</b>	3-5 hours

### Winter

<b>Trailhead location:</b>	3.5 km west of Rogers Pass Information Center
<b>Skiing distance:</b>	Approximately 7 km one way
<b>Elevation gain:</b>	2650 feet (808 meters)
<b>Approximate time:</b>	3-5 hours (more if there is a lot of fresh snow)

### Portering Services

Need help carrying your load? Check out our portering services!

### Trailhead location

Access is off the Trans-Canada Highway approximately 3.5 kilometers west of the Rogers Pass information centre. On the south side of the highway is a sign for the turnoff to the Illecillewaet Campground and parking area.

In the summertime you can drive up the road to the parking area near the Illecillewaet Campground and start the hike from here. In the winter the road to the campground is not plowed and instead a parking lot exists just off the side of the highway (same parking lot as for Wheeler Hut).

Please note; if you are driving up from the east it is a difficult turn to make along a dangerous curve of the highway into the parking lot. The better option is to continue driving several hundred meters further down the highway to a railway access road on the right-hand side where it is safer to turn around and approach the parking lot from the west.

### Summer approach

From the end of the Illecillewaet Campground, follow the trail marked "Asulkan Valley Trail". The first section is fairly easygoing as you hike alongside the Asulkan Creek on a good trail. After about 4 km the trail begins to steepen as you climb up to gain the crest of the moraine. From here (the end of the trail) it is another 300 meters up to the hut.

## Winter approach

From the plowed parking lot just off the highway (same parking lot as for Wheeler Hut), climb up the steep slope through the trees for approximately 50 meters to reach an old railway road. Turn left onto the road and follow it for barely a kilometer until the trail splits off from the railway road into a large open area on the right. The trail snakes up the obvious path through the trees until it pops out into the Asulkan Valley. The route along the valley floor is quite straightforward as it follows alongside the Asulkan Creek, however it does cross underneath a few significant avalanche slopes that are quite hazardous; good avalanche safety skills are necessary. When the valley begins to open up, make your way by choosing the safest slopes and head up to the right into a treed area. Make the steep climb up through the trees which will lead you to the final open slopes just below the hut. For a more detailed description of this route, refer to Chic Scott's guide *Summits & Icefields*, Columbia Mountains Alpine Ski Tours.

## Maps and Guidebooks

All of the following books and maps can be purchased through the ACC office or online through the ACC online store at: [www.alpineclubofcanada.ca/store/index.html](http://www.alpineclubofcanada.ca/store/index.html).

### Map and GPS references

<b>Map reference:</b>	82N/6 (Blaeberry) 82N/5 (Glacier)
<b>Grid reference:</b>	673735
<b>GPS coordinates:</b>	51°12' 42"-117°27' 48" NAD27 11U 467636 5673465
<b>Hut elevation:</b>	2100 meters (6890 feet)

### Maps

- "Touring at Rogers Pass" 1:50,000 topographic map by Murray Toft. This is an excellent map that shows trails and permanent closure areas in detail.
- 'The Adventure Map' Series 1:50,000 topographic map entitled "Rogers Pass". This map highlights summer hiking routes in the area.
- Chrismar Mapping Services 1:50,000 topographic map entitled "Rogers Pass". This excellent map shows trails and highlights in detail.
- The 1:50,000 Canadian Government issued standard topographic maps; "82N/6 Blaeberry" and "82N/5 Glacier".

### Guidebooks and general interest books

- *Summits & Icefields, Columbia Mountains*, by Chic Scott
- *Ski Touring in Rogers Pass*, by J.P. Kors and John Kelly
- *Selkirks South*, by David P. Jones
- *Selkirks North*, by David P. Jones
- *Backcountry Huts and Lodges of the Rockies and Columbias*, Jim Scott
- *Revelstoke Rock*, by Ruedi Beglinger

- *Radium Ski and Snowboarding Guide*, by Ted Johnson & Chris Hofstetter

## Website Links

### Current conditions

**Weather:** Go to [www.weather.gc.ca](http://www.weather.gc.ca) and click on <BC>, then scroll down to both <Revelstoke> and <Golden>. The weather forecast is not accurate for the exact location, but should be similar enough to give you an idea of the conditions in the Pass.

**Avalanche Hazard:** [www.avalanche.ca](http://www.avalanche.ca) - click on the <Public Avalanche Bulletins> and review the section for <Glacier National Park>. The avalanche forecast for this region is kept current throughout the winter season.

**Highway Conditions:** [www.pc.gc.ca/pn-np/bc/glacier/index\\_e.asp](http://www.pc.gc.ca/pn-np/bc/glacier/index_e.asp) click on <Road Conditions Report> on the left side. Parks Canada updates their <Mountain National Parks Road Conditions Report> by 9 am daily when road conditions change.

## Area information

**Avalanche Terrain Rating System (ATES):** Parks Canada has developed a classification system for avalanche terrain, and has applied ratings to approximately 250 trips in the Mountain National Parks. For more information on ratings throughout Glacier National Park, visit [www.pc.gc.ca/pn-np/bc/glacier/visit/visit7a1\\_E.asp](http://www.pc.gc.ca/pn-np/bc/glacier/visit/visit7a1_E.asp)

**1:50,000 Topographic Map:** The Canadian Government offers free downloads of their regular 1:50,000 topo maps. The map files are large (25 MB) and take a few minutes to download. You will find this service at: <http://www.geogratis.gc.ca/geogratis/en/product/search.do?id=10119>. Perform your search by selecting "NTS Mapsheet", and enter 082N06. Next, press <Search> under <Search Options> (without changing any of the information in <Search Options>). Select 082N06 from the options and download it.

**1:50,000 Topo Map:** Area specific version – YellowMaps.com offers access to the Canadian Government maps, but in smaller, area-specific versions. You will find the Rogers Pass area at: [yellowmaps.com/maps/rogers\\_pass\\_topo\\_map.htm](http://yellowmaps.com/maps/rogers_pass_topo_map.htm).

## Parks Canada Info

### Wilderness Passes in National Parks

Banff, Jasper, Kootenay, Yoho, and Glacier National Parks collect a fee for backcountry overnight use in the Parks. The fees collected from the wilderness passes go towards maintaining trails, supplying the voluntary registration service, avalanche forecasting, backcountry bridge-building, etc. Overnight users of the ACC huts (ages 16 and over) are required to pay this fee. A copy of the wilderness passes should be carried in the backcountry at all times as a Parks Canada representative may ask to see proof of purchase.

We encourage you to buy these passes from the ACC, as 40% of the monies collected goes to a special huts account for our heritage huts and environmental improvements. You will be offered the option to purchase the pass when you make a reservation, or you can buy an annual pass from our online store at: <http://www.alpineclubofcanada.ca/store/index.html>. For current rates, visit: <http://www.alpineclubofcanada.ca/facility/rates.html>.

### Vehicle Permits

All vehicles stopping in a National Park must have a Park Motor Vehicle Permit. Annual or single day permits can be purchased at most Park entrance gates and Park visitor centres and soon through the Alpine Club of Canada's national office.

### Glacier National Park Avalanche Control

Wardens in Glacier National Park are involved in avalanche control to maintain the safety of vehicles traveling along the highway. Heavy artillery fire is used on the slopes surrounding the highway and these areas as well as all snow-study areas are closed to the public. More information on the location of the permanent-closure areas is available at the Visitor Centre.

In the wintertime parking is restricted to specific areas along the road in order to avoid interfering with snow plowing and artillery fire. Designated parking areas are snowplowed, however avalanche control may begin while you are out on your day of skiing in which case you may find a card on the windshield of your car. If this occurs, you are asked to remain with your vehicle in the parking area until you are notified that the highway has been re-opened.

# Asulkan Cabin

## Closed Area Entry Permits

Certain areas in Rogers Pass are permanently closed due to the threat of avalanches to the Highway. Depending on the conditions, the wardens may open some of the restricted-access areas to skiing on a day-to-day basis. If you plan to ski in these areas, a permit is required and can be picked up free of charge from the Rogers Pass Visitor Centre. It is a criminal offence to ski in closed areas without the required permit.

## Voluntary Registration Service

All visitors have the option to register their summer or winter trips within the National Park. It is recommended that anyone participating in hazardous activities in the backcountry register their trips with the wardens. This registration is free and is the best method of ensuring that a search will be initiated if you fail to return on the specified date.

## Maximum Group Size

The maximum group size for hiking is 10 persons. If your group is larger, you will need to split into smaller groups.

## What Is At the Hut

### Summary

<b>Heating:</b>	Propane furnace
<b>Lighting:</b>	Propane lights
<b>Cooking:</b>	Propane stove, cookware, dishes & utensils provided
<b>Sleeping:</b>	Dormitory style on thick foam mattresses
<b>Capacity:</b>	12 in the summer and the winter
<b>Drinking water:</b>	Glacial stream in the summer, snowmelt in the winter
<b>Human Waste:</b>	Outhouse
<b>Dishwater:</b>	Greywater pit
<b>Garbage:</b>	Pack it out!

### The buildings

The Asulkan Cabin is a beautiful panabode style building made of wood. The modern building is made up of one room sharing the kitchen and eating area with large glass windows, and an upstairs loft for sleeping.

### Capacity

The hut sleeps 12 in the summer as well as in the winter. The sleeping quarters are on thin foam mats (many people bring their own in addition) and are arranged dormitory-style on long, shared bunks in the upstairs loft.

### Kitchen

The kitchen is well supplied with basic dishes, cutlery, utensils, pots and pans. There are several two-burner propane stoves for cooking.

# Asulkan Cabin

## Lighting

The hut is lit by several propane lights. Propane is supplied by the ACC via a large outdoor tank.

## Heat

The hut is heated by a modern propane furnace.

## Tools

The hut has a good supply of tools including water buckets, axes, saws, shovels, etc. for proper maintenance of the hut.

## Drinking Water

In the summer drinking water can be reached from glacial runoff, and in the winter from snowmelt. It is recommended that all water be boiled or filtered before drinking.

## Grey Water

Water can be poured directly down the drains but please ensure that food scraps are pulled out of the sink and strainers. Do not leave food scraps behind, and do not throw them into the outhouse. Please pack it out.

## Human Waste

The outhouse is located approximately 30 meters next to the hut. Please do not dispose of any unnecessary waste into the outhouse.

## Garbage

All paper garbage, recyclables, unused food, and food scraps should be packed out of the hut. In the summer garbage can be deposited in Parks Canada containers in the campground. Do not leave any garbage behind, pack it out!

## What you need to bring

- combination lock number for the hut door (call the ACC office to confirm before you go to the hut)
- sleeping bag
- food for the duration of your stay
- toilet paper
- matches
- first aid kit
- 9V battery for the smoke detector
- reservation form from the ACC

## Hut Rules

Here is a list of simple rules we ask you to follow in order to maximize everyone's enjoyment of the "hut experience."

### While at the hut:

- No smoking.
- Dogs are not permitted in any ACC facility (with the exception of seeing eye dogs).
- Some Parks also outlaw dogs entirely; leashed or not. Check before you go!
- If you arrive at the hut before 2:00pm, put your belongings where they will not disturb the previous nights' occupants.

# Asulkan Cabin

- Please be considerate of others; the hut should be quiet by 10 pm.
- Carry out all of your garbage.
- Do not do personal washing in cooking pots or nearby streams - use wash basins and slop pits.
- Clean the stoves after using them.
- Clean up after yourself.
- Follow posted instructions for care and maintenance of toilet systems so that they function properly with minimum odor and environmental impact.

## When leaving a hut:

- If your belongings will be in the hut after 2:00pm, and you are not staying that night, be sure to pack everything up and leave it out of the way in a corner so the new guests can move in.
- Leave all tools inside the hut when not being used.
- Empty all water containers and slop buckets before leaving the hut.
- Take out all leftover food as food left in the hut encourages rodents. (Other people generally won't use it as they don't know how old it is.)
- Bring out damaged axes, lanterns or stoves and discharged fire extinguishers - advise the national office.
- Close & latch the outhouse door when leaving to keep out rodents & snow.
- Close/lock hut, replace shutters (if applicable), before leaving the hut.
- A nearly full outhouse, damage to hut & similar matters should be reported to the national office (you may call collect)

**Please leave the hut in better condition than you found it.** Thank you for your consideration in following these rules, and have a great time!

## Things To Do Around the Hut

### Hiking, Scrambling and Mountaineering

The rugged terrain in Glacier National Park creates the opportunity for many challenging trips. The mountains are steep, the valleys are narrow and many of the trails involve high elevation gain to reach stunning ridges and peaks. The Asulkan Cabin is an excellent destination in itself, as well as an excellent place to spend a night to reach further hiking trails nearby and to discover classics further along in the Park. Trips across the glacier up to Asulkan Pass or Youngs Peak are great objectives from the hut, as well as Castor Peak and Sapphire Col – a classic to the area.

### Backcountry Skiing

The Rogers Pass area offers some of the best powder skiing in the country, with its legendary deep snow and long ski descents. There are a great number of opportunities for every type of ski outing; steep ascents such as the popular Youngs Peak, tours through glades and alpine bowls throughout the Illecillewaet and Asulkan Valleys, and glacier traverses across the icefields. The potential to access high-quality trips from the Asulkan Cabin is outstanding! The trip up to the hut itself, as well as many of the ski touring destinations, are within avalanche terrain and skiers are urged to be prepared with the proper equipment and knowledge for avalanche safety. You can find these amazing ski tours described in Chic Scott's book 'Summits & Icefields, Columbia Mountains'.
